Power Words: The Key to Manifesting the Life You Truly Desire (Seminar Presentation)

The Law of Attraction states that "like attracts like" and what we think about most often becomes our reality. We think, speak and write in words and language plays a huge role in the life we create for ourselves. Words have started and ended wars, built and destroyed nations, created peace, saved lives, launched life-changing movements, formed musical or literary masterpieces, and brought clarity or misunderstanding to people and situations for centuries. The power of words is unmatched in terms of human expression. No other form of communication has the ability to profoundly affect and drastically change both our inner and outer world like words.

Have you ever noticed that successful, happy people use more positive words? A study done in 2005 by an associate professor of applied linguistics and anthropologist at Pennsylvania State University, revealed that negative words dominate our vocabulary. The

study (titled appropriately), “Negative Words Dominate Language,” showed that all groups in the study, regardless of age or nationality, had the same results:

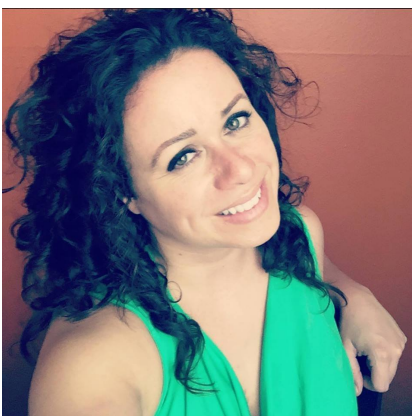

“Half of all the words that people produce from their working vocabulary to express emotion are negative.” –Dr. Robert Schrauf, associate professor of applied linguistics and anthropologist, Pennsylvania State University

Negative words are energetic junk food. We can't manifest our desires if we're using words of lack and doubt. Learn how to eliminate negative vocabulary and replace it with positive personalized language that will transform your life into one of fulfillment and gratitude.
