WAT?

Community College

It can be an amazing thing.

An aerial photograph of the University of California, Santa Barbara campus. The image shows the coastline on the left, with waves crashing against the shore. The campus buildings are visible in the center and right, surrounded by greenery and a winding river. In the background, there are rolling hills and mountains under a clear sky. The text 'UCSB' is overlaid in large white letters across the center of the image.

Laftster LAUGH ENGINE

- Innovative algorithm drives discovery using diverse classification categories
- Developed with comedians and neuroscientists studying brain's response to humor

* Small sample of algorithm characteristics

Laffster VS. COMPETITION

1. Diverse **content** offerings

Constantly updated from festivals, clubs, podcasts, etc.

2. Comedian supported **platform**

Top 10 comedian Twitter accounts average 3.6M followers

3. Focus on comedy **discovery**

Start with Jerry Seinfeld,  your way to his successor

4. Early **international** expansion

Licensing strategy = low barriers to entry worldwide

1. CD/DVD material only

Stale content with 6-12 months from recording to release

2. Comedian ignored platform

Lack of promotional support = no incentive to drive fans

3. Continued focus on music

Comedy an afterthought due to steep music competition

4. Geographic expansion limited

Licensing restrictions limit growth to large comedy markets
